PRODUCT DESIGN GROUP PROJECT

HSSM301

Computer Engineering Department

FCRIT, Vashi

Group Project (15 Marks – CO1 & CO5): Design a Website and Mobile application for selling products related to Environment, Recycling or Eco-friendly concepts & generate the Process Design Steps in detail for your design.

Incorporate the following features:

1. Product Design Requirements
2. Wireframe Design
3. Implementation of Ergonomics and Aesthetics principles
4. Environmental aspect of your design

Solution: Students are expected to use write in detail about the above mentioned Process and to create a presentation (min. 10 slides) and present it and document the entire process in minimum ten-page report (Each Group will submit one report).

Presentation – 10 marks

Report – 5 marks

Group Project Report - Solution with Rubrics [5M]

1. Title page [1M]
2. Product Design Requirements [1M]
3. Wireframe Design [1M]
4. Implementation of Ergonomics and Aesthetics principles [1M]
5. Environmental aspect of your design [1M]

Group Project Presentation - Solution with Rubrics [10M]

1. Title slide [1M]
2. Product Design Requirements [1M]
3. Wireframe Design [1M]
4. Implementation of Ergonomics and Aesthetics principles [1M]
5. Environmental aspect of your design [1M]
6. Images of Website or App design [1M]
7. Explanation during presentation [4M]
